

# My Adventure in Thailand

*by Holly Liu*

I remembered that I first go abroad. That year I was six. I thought anything is very new for me. The airport, the airplane ..... That day I was confoused, because I didn't know why I must to get up so early. And I wanted to go back to sleep. But when we arrived to the airport. I became very excited.

We waited for a long time. I felt very bored. Finally we got on the airplane. The waitresses were very polite and very kind to us. They gave us a little book in English. I was very happy, but I didn't understand what is the story about.

We went there for ten days. It was very hot then. When we turned on TV. It was very boring, too. Because all of the shows, news are Thailand. Though we watched it, we still don't know what they were talking about.

The third day, we went to a zoo. We saw many crocodiles there. The performer put his head into crocodile's mouth. But the crocodile didn't bite him. It was surprising to me. That was the first time I saw crocodiles, and I thought they were very friendly.

Then I saw many elephants walking on the road. And some people set on them and controled them. But they took a hammer. When the elephants didn't listen to them. They used hammers to hurt them .The elephants were very poor.

The elephants are very large, so I was very scared. I couldn't stand behind them and took a picture. I was afraid of standing around them.

Time flies, nine years passes. It was a good memory. I remember it because that was the first time I went abroad.
